

Peabody Treatment Progress Battery (PTPB)

<http://peabody.vanderbilt.edu/ptpb>

*A cohesive, comprehensive, and evidence-based mental health assessment battery for youths 11-18.
Available under license from Vanderbilt University at no cost.*

The PTPB manual includes:

- ✓ A schedule of administration
- ✓ Codebooks for researchers
- ✓ Printable versions of measures
- ✓ Additional administrative forms
- ✓ Psychometric information
- ✓ Printable versions of self-scoring forms

| The PTPB includes 10 measures of treatment progress and process. | | | |
|---|--|---|------------------------|
| Construct | Respondent | | |
| | Youth | Caregiver | Clinician |
| Treatment Progress of Youth | Symptoms & Functioning Life Satisfaction Hope | Symptoms & Functioning | Symptoms & Functioning |
| Treatment Process of Youth and Caregiver | Therapeutic Alliance Treatment Motivation Treatment Expectancies Service Satisfaction Perceived Session Impact | Therapeutic Alliance Treatment Motivation Treatment Expectancies Service Satisfaction Caregiver Strain Life Satisfaction | Therapeutic Alliance |

Special Features of the PTPB:

- ◆ Weekly administration takes 5-8 minutes
- ◆ Easy to administer
- ◆ Uses a common factors approach to measurement of treatment processes
- ◆ Available in English or Spanish
- ◆ Provides instruments for intake, concurrent with treatment, discharge, and follow up
- ◆ Well-documented reliability and validity
- ◆ Useful with most types of treatment
- ◆ Suitable for mental health services research
- ◆ Written at a fourth-grade reading level

Are you interested in an automated system?

The **Peabody Treatment Progress Battery** is one component of an automated, self-scoring, and clinically oriented feedback system known as **Contextualized Feedback Intervention and Training (CFIT)**, developed by Peabody's Center for Evaluation and Program Improvement.

Key components of **CFIT**:

- ◆ Measurement (the PTPB)
- ◆ Detailed feedback
- ◆ Onsite training
- ◆ Web-based clinical training modules
